XD-2i	<p>Rugged and hand-held, the XD-2i Explosives Detector was originally designed for first responders. After superior performance in extensive test trials, the XD-2i is now available to all security personnel.</p> <p>The XD-2i is easy to use and its processing time is extraordinarily fast: 0-30 seconds! It has the capability to detect nanogram amounts of primary and secondary explosives, peroxides, nitrates, perchlorates, chlorates, gun propellant, and black powder. The XD-2i can detect over 40 different explosives and it can do it all with no downtime between samples. The XD-2i can operate in all weather conditions due to its special design which allows it to operate even in humid weather conditions with no calibration, and no false positives. An SK2-XD2i is included with every unit. Additional solution replacement kits are sold separately.</p>	American Innovations Inc	XD-2i	Detection Equipment	EA	\$13,309.71	17.24%	0.5%	\$11,070.19
XD-3i	<p>The XD-3i embodies innovative technology improvements; this state of the art explosive detector uses a patent pending combination of benign solutions applied automatically to the sample which is then subjected to a rapid controlled heating cycle. The XD-3i detects all homemade and military explosives, including TATP, and Perchlorate.</p> <p>Results data is displayed in a simple easy to read format. A constant visual of the swipe is also displayed, adding a second level of data for a more comprehensive assessment. The automated process indicates the presence or absence of explosives, as well as a time and date stamp that is stored in memory for later download.</p> <p>The system will detect and distinguish liquid peroxide, perchlorates, and chlorates from benign liquids such as drinks, lotions, hygiene products, and contact lens solutions. Military explosives are also detected. The XD-3i is extremely fast and accurate; it can process a sample in 10 seconds!</p>	American Innovations Inc	XD-3i	Detection Equipment	EA	\$43,559.03	17.49%	0.5%	\$36,120.26

	The colorimetric detection of the XD-3i provides no false positives and it is not affected by external conditions such as moisture, heat, altitude, cigarette smoke, household, or petroleum products. The XD-3i Explosives Detector provides sample to sample reproducibility, trace level detection, large dynamic range, and it is highly sensitive.								
ITS-XD2i	On-site Training Services for XD-2i	American Innovations Inc	ITS-XD2i	Detection Equipment	EA	\$3,342.00	17.50%	0.5%	\$2,770.94
